

STARSOFT 59 UV

GM Advance represents an evolutionary advance on the properties of other GMA-based soft lens materials. It achieves high manufacturing yields, while its exceptional on-eye stability, water retention and durability provide patient satisfaction.

Technical information

Material Characteristics:

Material	Acofilcon A	Light transmission	N/A
Water Content	58	CE Approved	Yes
UV Blocker	Yes	Use time	6 months
Handling tint	Clear	Material belonging according to the FDA	II
DK	25x10 ⁻¹¹	Manufacturing	Lathing
